Md Mehefujur Rahman Mubin

Lecturer, CSE, Daffodil International University

rahman.cse@diu.edu.bd LinkedIn Google Scholar

Professional Profile

Computer Science academic and researcher with experience in teaching, research, and professional training. Interested in the practical applications of emerging technologies, including artificial intelligence, machine learning, and robotics. Experienced in facilitating training sessions on prompt engineering and the effective use of AI tools for research and workplace productivity.

Training & Facilitation Experience

AI Powered Productivity Transformation and Strategic Leadership Training Trainer / Facilitator

Prompt Engineering Module

- Facilitated the Prompt Engineering module, focusing on effective interaction with AI systems and designing task-oriented prompts.
- Demonstrated the application of different AI tools for research, information gathering, content generation, and workplace productivity.
- Introduced Perplexity AI for research-oriented information discovery, source exploration, and fact-checking.
- Emphasized practical AI workflows to improve efficiency, critical thinking, and informed decision-making.

Professional Experience

Lecturer, Department of Computer Science and Engineering September 2025 – Present

Daffodil International University, Bangladesh

- Teach undergraduate courses including Object-Oriented Programming, Operating Systems, and Computer Graphics.
- Develop course materials, assessments, and instructional activities following Outcome-Based Education (OBE) principles.
- Mentor undergraduate students in academic development, research activities, and career planning.
- Contribute to institutional accreditation, curriculum, and academic quality assurance activities.

Machine Learning Engineer April 2025 – September 2025

Metrosofts, Sweden

- Worked on computer vision and NLP-based systems for contextual understanding and intelligent human-computer interaction.
- Explored visual grounding, object detection, and task planning for autonomous interaction systems.

Research Assistant February 2025 – September 2025

Center for Industrial Automation, Robotics and IoT, Independent University, Bangladesh

- Contributed to machine learning and deep learning research involving UAV imagery, botanical plant classification, and dental radiographic analysis.
- Worked on IoT-based water quality analysis and predictive modeling.
- Supported undergraduate research and mentored student researchers.

Research & Technical Experience

UIU Mars Rover Team – Science Team Member July 2022 – June 2024

- Participated in the University Rover Challenge (URC) 2024, contributing to scientific investigations involving soil sample analysis, life detection, and rock identification in a Mars-analog environment.
- The team secured 5th place globally and 1st place among Asian teams at URC 2024.

Education

Bachelor of Science in Computer Science and Engineering 2024
United International University (UIU), Bangladesh
Major: Data Science

Core Competencies

AI & Productivity: Prompt Engineering, Generative AI, AI-powered Research, AI-assisted Workflows, Perplexity AI, NotebookLM

Research & Technology: Machine Learning, Deep Learning, Computer Vision, Natural Language Processing, Robotics, IoT, Autonomous Systems

Professional Skills: Technical Training, Academic Teaching, Research Mentoring, Technical Communication, Curriculum Development, Outcome-Based Education
