Research Interest

My research interests focus on computer vision, particularly state-of-the-art image-based applications. I have experience working with deep learning models like ANN, CNN. Currently, I am engaged in multi-modal research across multiple projects. Additionally, I am also involved in Human-Computer Interaction (HCI) research. my curiosity in cybersecurity has led me to explore blockchain technology, where I focus on integrating blockchain technology with my computer vision research.

Publication

Journal Articles

An IoT-and cloud-based e-waste management system for resource reclamation with a data-driven decision-making process Paper Link

Collaborators : M.Farzana, AB. Fahad, ***SE Alam***, MM Islam | **Publisher :** MDPI (IOT) | Impact factor : 2.8

Conference Papers

Thought Scope: Human Cognitive Thinking Classification from Eye Position using Deep Learning and Digital Image Processing Paper Link

Collaborators : M.Farzana, ***SE Alam***, AB. Fahad, R Rahman | **Publisher :** IEEE Xplore

Conferance : 2023 26th International Conference on Computer and Information Technology (ICCIT)

Recyclable Waste Image Classification using Convolutional Neural Networks Paper Link

Collaborators : AB. Fahad, ***SE Alam***,M.Farzana, DM Farid | **Publisher :** IEEE Xplore

Conferance : 2023 26th International Conference on Computer and Information Technology (ICCIT)

Advancing Individual Well-being: Fatigue Detection Enhancement using Deep Learning Models Paper Link

Collaborators : ME Khondoker, ***SE Alam*** , AA Mayen, R Rahman | **Publisher :** ACM

Conferance : ICCA '24: Proceedings of the 3rd International Conference on Computing Advancements

Training Program

Training Facilitator, AI-Powered Productivity Transformation & Strategic Leadership Training Program July 2026

*A practical, AI-focused professional training program designed for professionals from **Titas Gas Transmission & Distribution PLC** by Department of CSE, Daffodil International University, focusing on the effective use of modern AI tools to enhance workplace productivity, research, information management, and decision-making. The training emphasized hands-on application of AI in real-world professional workflows, including research, knowledge organization, document analysis, content generation, and strategic problem-solving. As part of the program, I conducted a dedicated training session titled **"Mastering NotebookLM: The Ultimate Research and Productivity Guide,"** focusing on using NotebookLM for efficient research, document analysis, knowledge synthesis, and productivity enhancement.*

Training Facilitator, AI-Powered Workplace Productivity & Smart Office Practices October 2026

AI-focused professional training program designed for professionals from **COATS Bangladesh** by the Department of CSE, Daffodil International University, focusing on the effective use of modern AI tools to enhance workplace productivity, cross-functional collaboration, and smart office operations. The training emphasized the hands-on

application of generative AI in real-world professional workflows, including business analysis, strategic planning, task automation, and impactful presentation design. As part of the program, I conducted a dedicated training session titled "**Analysis, Planning & Presentation Productivity**," focusing on leveraging **Microsoft Copilot** for data-driven analysis, structured project planning, rapid content synthesis, and the automated creation of professional business presentations.

Education

BSc in Computer Science and Engineering, United International University Jan 2020 – Jan 2024

- **CGPA:** 3.90 out of 4.0 (Awarded : Summa cum laude) | **Major:** Data Science

Teaching Experience

Lecturer, Department of CSE, Daffodil International University July 2024 – Present

- Deliver undergraduate Computer Science courses with full curriculum coverage while providing academic counseling and mentoring to students on coursework.
- **Conducted Courses** : Database Management System, Operating System, Information Security, Mobile Application Design, Digital Logic Design, Artificial Intelligence.

Instructor (Contractual Lecturer), Department of CSE, United International University Jan 2024 – July 2024

- Conducted comprehensive classes on foundational computer science courses.
- **Conducted Courses :** Discrete Mathematics, Digital Logic Design, Database Management System, Object Oriented Programming.

Undergraduate Teaching Assistant, Department of CSE, United International University Sept 2022 – Jan 2024

- Assisted faculty in conducting smooth and effective classroom sessions.
- Evaluated student performance through quizzes, midterms, and final examinations.

Awards and Honors

Research Grant :Institute for Advanced Research (IAR)

Received research grant from Institute for Advanced Research (IAR) for a project titled as "Optimized Transformer Architecture for Enhanced Performance and Computational Efficiency in Natural Language Understanding and Generation".

Scholarship for Academic Excellence : United International University

Achieved academic excellence with outstanding GPA performance throughout the academic year. Maintained a CGPA of 3.90 out of 4.00 in CSE program and got awarded with "Summa cum laude ".

Project Show Champion Spring 2023 : United International University

Completed Compete against 30+ teams and we came out on top with our project in System Analysis and Design course.

Achieved CCNA Badge of Introduction to Networks : Cisco Networking Academy

Completed The Introduction to Networks course which was arranged by cisco & got full scholarship on that course. Passed the final exam obtaining 90% marks.
